

[Home](#) [Challenge](#) [Map](#) [Documentation](#) [Change Candidate ID](#)

Congratulations! You finished our challenge! :D

The secret passphrase you should tell your recruiter is **"Parkour to the moon!"**

Make sure that you also send them any code you used to solve this challenge (ideally through a [github.com repository](#)), as we'll be reviewing it!

Phase 2: Crossmint logo. With 🌙SOLoons and 🚀comETHs!

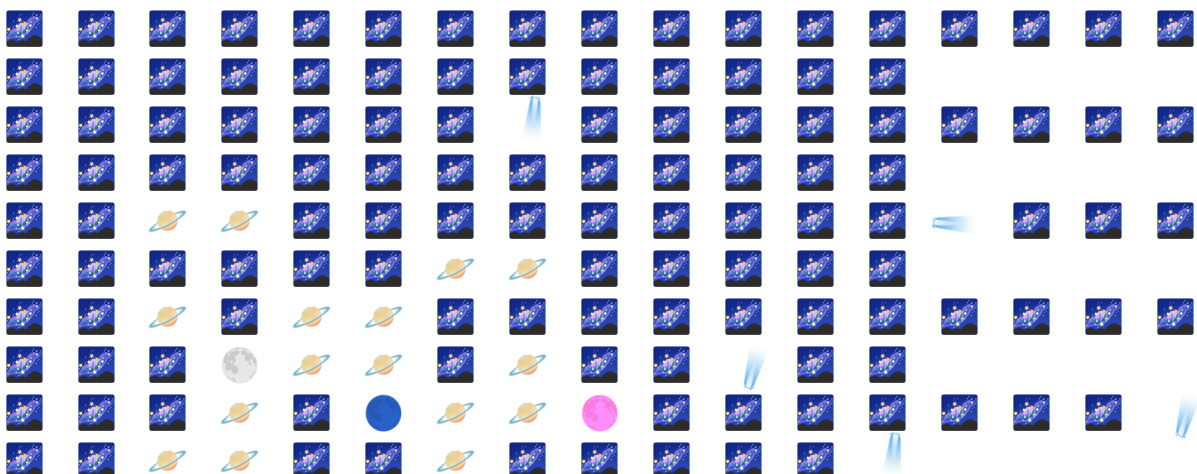

In this second phase, you will have to build another megaverse... including the shape of our logo!

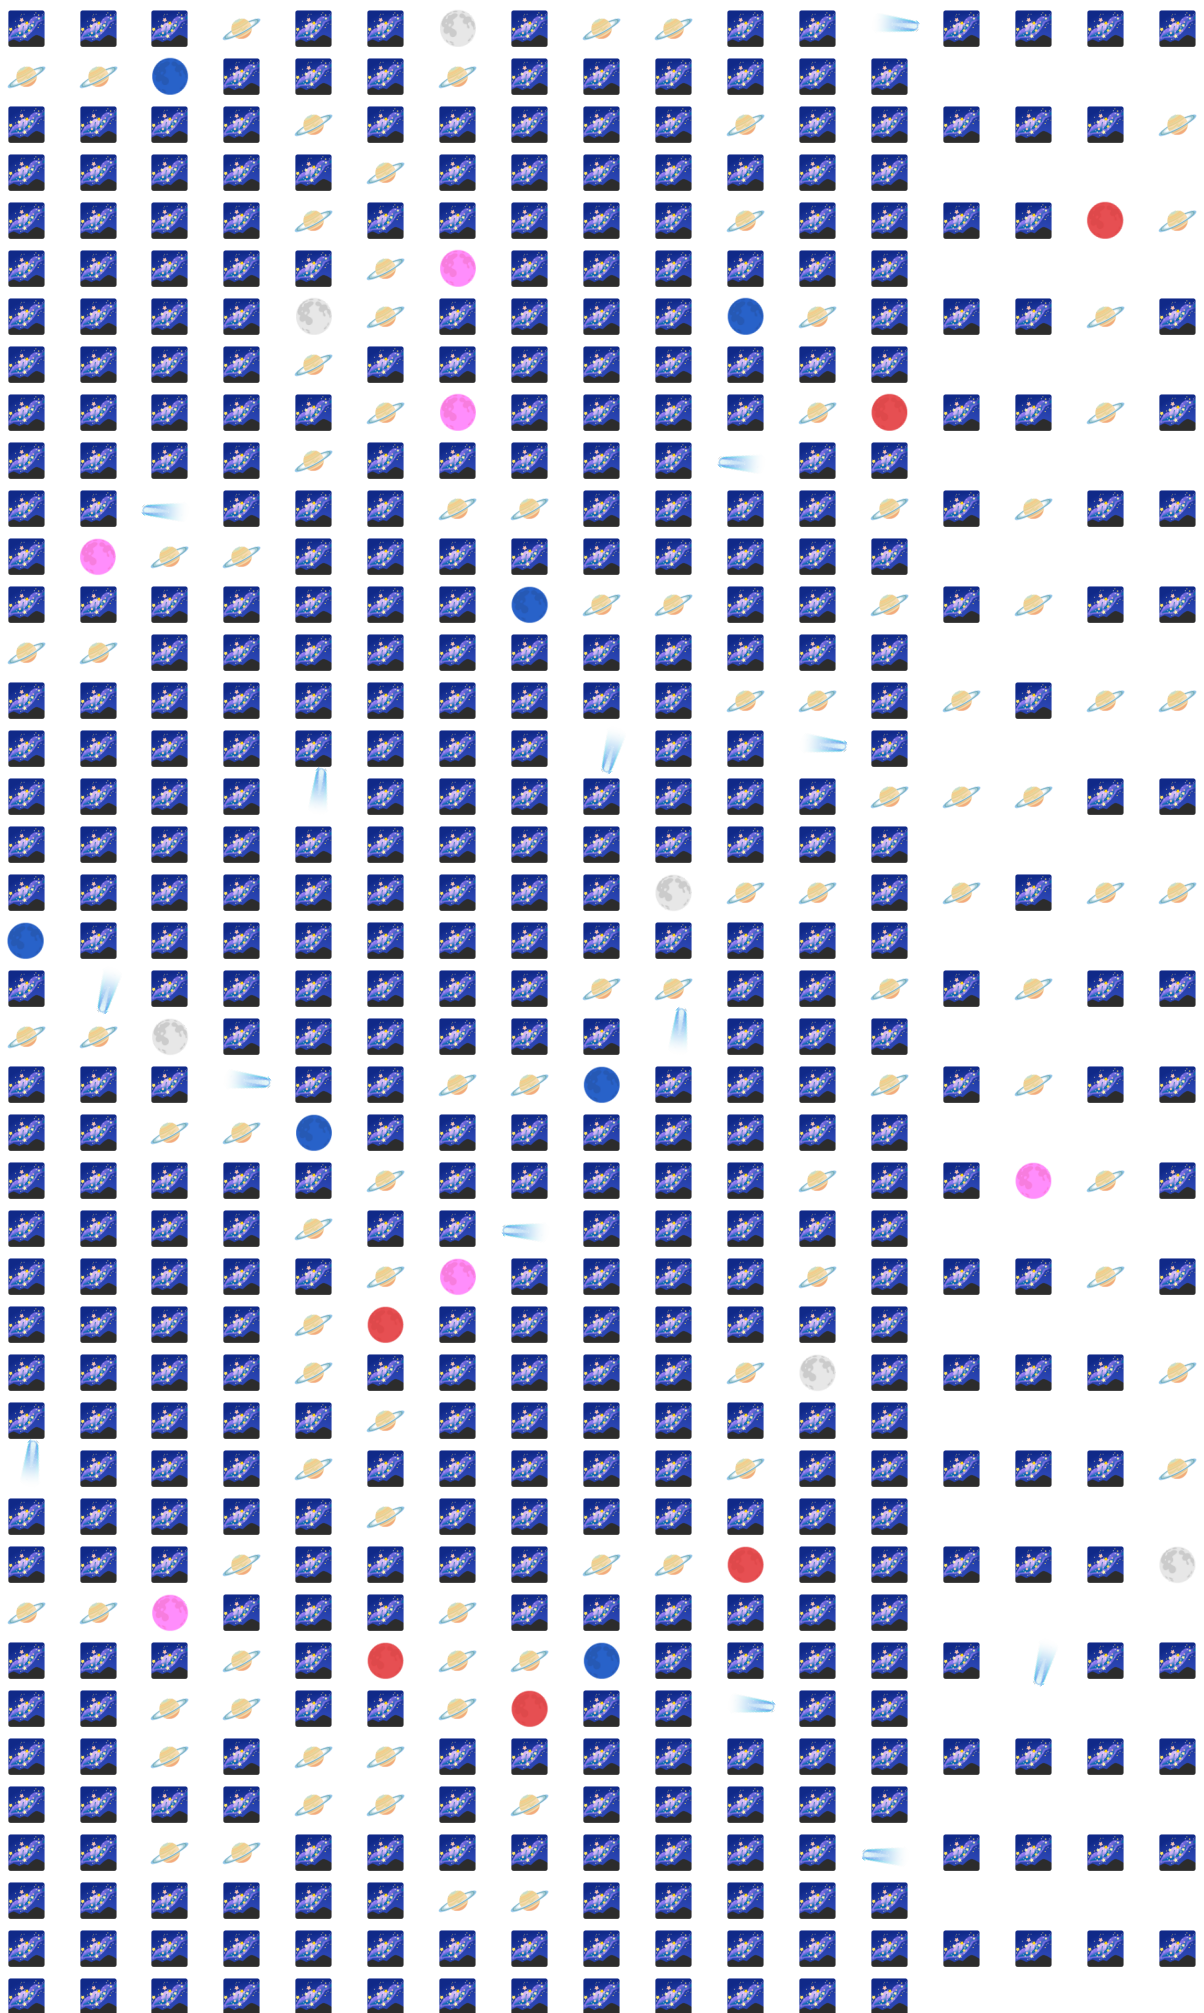

This new map has some other entities as well: 🌙SOLoons and 🚀comETHs.

- 🌙SOLoons can only be adjacent to a 🌌POLYanet, and they can have a variety of colors.
- 🚀comETHs can go alone in the universe, but they have a direction they're facing. You can see their specifications and APIs on the same [Docs](#).

IMPORTANT: Building the map manually is NOT a solution we are looking for here. There are multiple ways to solve this problem, but maybe the `/api/map/[candidateId]/goal` endpoint might help.

The final result will look like this:

See my map
